## Work experience

---

### PotterworldMC LLC

June 2015 — July 2015

Java Developer

Responsibilities included taking off-jobs that the senior developers weren't able to do where I was developing smaller but important experiences for players.

### Rowling's Realm

July 2017 — September 2017

Lead Java Developer

Responsibilities included managing a team of developers and delegating Spigot server plugin projects to others along with handling the significant projects on the server.

### Astoria Network

September 2017 — Present

Lead Java Developer

Responsibilities included managing a team of developers as with my previous job. Additionally, I managed a network of server connections which attracted players from various interests.

## Interests

---

Computer science, web design, web development.
